Marsden Eye is recruiting patients for clinical trials

Marsden Eye boasts a dedicated research division that collaborates with prominent global pharmaceutical companies committed to advancing innovative therapies for managing ocular diseases. Participating in clinical trials presents a valuable opportunity for patients to contribute to the development and implementation of novel treatments that might otherwise be inaccessible to them. Moreover, these trials contribute to enhanced models of care and heightened vigilance in monitoring eye health and management plans. Marsden Eye Specialist Research Centre actively seeks individuals to participate in our diverse array of clinical trials. Currently, we are enrolling patients with conditions such as:

- Wet Age Related Macular Degeneration
- Intermediate Age Related Macular Degeneration
- Diabetic Macular Edema, and
- Retinal Vein Occlusion.

Kirin AMD – phase 2 wet AMD treatment comparing KHK eye drops with aflibercept

Duration:

- 1-year, monthly visits

Requirements:

- Have active subfoveal or juxtafoveal MNV secondary to AMD
- BCVA: 20/40 to 20/200

Kirin DME – phase 2 DME treatment comparing KHK eye drops with aflibercept

Duration:

- 1-year, monthly visits

Requirements:

- Can be type-1 or type-2 diabetes
- BCVA: 20/40 to 20/200
- HbA1c \leq 11%

Quasar RVO – Phase 3 RVO treatment using high dose aflibercept IVT

Duration:

- 1-year, monthly visits

Requirements:

- Must have macular oedema secondary to RVO (BRVO, CRVO or HRVO)
- BCVA: 20/40 to 20/320

INSITE DME – DME treatment comparing treat & extend versus fixed dosing with Faricimab

Duration:

- 2-years, visits every 1-2 monthly

Requirements:

- Can be diabetes type-1 or type-2
- Macular thickening from DME
- BCVA: 20/25 to 20/400
- HbA1C \leq 10%

HONU – Intermediate AMD observational study

Duration:

- 3 years, visits every 3 monthly

Requirements:

- BCVA: $>$ 20/40
- Drusen with no GA

We also have upcoming geographic atrophy (GA) studies, please refer any GA patients for discussion and possible enrolment in future.

If you would like to discuss candidate eligibility for these clinical trials, or have any further questions regarding other clinical trials we run, please contact trish.forsyth@marsdeneye.com

Wishing a Prosperous New Year to Our Referral Partners

Marsden Eye Specialists extend warm wishes for a prosperous New Year to our esteemed optometry referrers. As we embark on the exciting journey of 2024, we value the collaborative efforts that have strengthened our professional relationship. To ensure you stay informed about the latest developments in our practice, we encourage you to send an email to marsdenliaison@marsdeneye.com.

By doing so, you'll be connected with our dedicated liaison team, keeping you in the loop about upcoming advancements, events, and opportunities for collaboration. We look forward to continuing our shared commitment to delivering exceptional eye care services and fostering mutual success in the coming year. Here's to a year filled with growth, innovation, and continued partnership!

Updated Website

We at Marsden are continually looking to improve our services and accessibility to our patients and referrers. We are working very hard behind the scenes to ensure our website has a seamless and user-friendly interface so they can access information readily and easily

Thank You

Marsden Eye Specialists would like to thank you for entrusting your patients to our care. We have new patient appointments available every day and all urgent referrals are seen the same day by one of our specialists.

We have office locations throughout Western Sydney to provide easy access to the latest diagnostic and treatment options, as well as access to clinical trials for your patients.

Our best contact email is enquiry@marsdeneye.com

Upcoming Educational Events

Please email marsdenliaison@marsdeneye.com if you would like to know when our next educational event is and how you can be a part of it.

We have currently adopted a hybrid approach to our seminars where clinicians have the choice of attending in person, or watch our specialists talk via live stream services.
